

Mind Campus

Managing Excellence : Campus Management System

Mindlogicx Infotech Ltd seamlessly integrates with all campus management solutions to instantly deliver more secure, digital versions of your paper and other electronic documents associated with campus management transactions.

MindCampus is an integrated campus management solution that will address functionality related to the delivery of Academic/Student services.

The system is easy to use and even easier to support and highly affordable. MindCampus offers visibility of data across areas such as admission, student management, course management and recruitment to name a few. The difference however is the approach. While other vendors offer cumbersome solutions that require months upon months of customization. Mind campus offers a turnkey approach, enabling implementation to go quickly and smoothly time and time again. Turnkey doesn't mean inflexible. MindCampus solutions are both customizable and configurable.

MindCampus is already here with : Admission and fee management, Student management, Student management with Recruitment, Attendance management, Internal and External Examination Management, Integrated Library management, Laboratory management, Hostel management, Course management, Inventory Control, Visitor management, Integrated Portal.

Admission and Fee management

Today it has become too cumbersome to get admitted to reputed organizations which provides content rich education. The admission procedure being difficult managing large sums of amount, with time consuming interview and admission procedures, when parents cannot afford to spend their valuable time for their wards' waiting in queues as the number of students opting for any course are growing in millions. We have come with a solution to admission

and fee management, defining selection criteria and selection stages, defining fee structure and fee entry, Roll number and class allotment, Supports Internal and External aid management, Manage Fees and also inflow and outflow of funds, Based on percentages / Based on fixed amounts, Internal Management - Posts credits to student account, Posts debits to sponsor account, Evaluates Students to determine whether fees has been paid, Generate no due

certificate, Real-time update of student accounts.

Student Management

Use MindCampus for efficient student management. Managing the students' data in a systematic way can take us to heights. For managing demographic Data, Applications management, to get the Program Registration Information, to decide about the Scholarships, to know about the Academic Performance and Course Registration History.

Staff management with Recruitment

Staff management is another feature of MindCampus. The complete staff data with payroll system is managed effectively. We follow RFID based attendance management system which uses smart card to track the in-out details. Efficient way of Class allotment and to know the Academic details about each student.

Recruitment can be handled internally or externally eliminating double entry. Recruitment management which usually takes a very long and tedious procedure is managed in an orderly and systematic way. Multiple status settings available to track the progress of recruitment. Active recruitment campaigns can be managed using MindCampus. Recruitment data can also be transferred from a separate system.

Attendance Management

Attendance plays a very important role for any student to go in for any examination. In many occasions, we find students not attending classes but directly going for an examination. It takes a lot of tracking to find out the attendance details in lab, library and in theory classes. RFID based automated system / non-automated system for attendance registration solves a lot of such problems. Detailed daily/monthly/semester /annual attendance report is generated, Smart card assignment and management is introduced and the Attendance statistical analysis is taken to monitor their attendance in each Session.

Internal and External Examination Management

Mindcampus Provides an interface to manage the entire pre-examination and post-examination processes. Generate timetable, dates and timings of the examination, assign invigilators on that particular day. Results can be generated for all the students. Mindcampus Sets policies to generate results and perform post-Exam Analysis. Managing locations designated for conducting the Tests and generating reports on the same, Hall Tickets can be generated.

Conducting online examination. Generating statistical reports on the test results.

Integrated Library Management System

Library Book issues and receipts : The patron will be issued a RFID based library card, which will have the information about the user. When the tag is read, the details of the books issued to the particular user can be viewed and updated for recording the library transaction.

Book Catalog : The software helps in getting the required information of the book just by a mouse click.

Book Reservation : The book can be reserved to be issued based on the availability of the book.

Book Tracking : All the books issued and returned will be recorded in the database.

Visitor Information : The list of visitors who enters the library can be recorded, which helps in secure and efficient management of the library.

Centralized Electronic Transaction : All the various divisions and branches with in an organization which maintains a separate library can be controlled and managed at a centralized location. This helps in better maintenance of the library resources.

Reporting System : Full set of customizable reports can be generated covering the Book list, Book Details, Daily/Weekly/Monthly issue, returns, renewals, Fine collection, Reservation, User details, Visitor details, Operator Log.

Laboratory Administration

MindCampus provides excellent laboratory administration guidance. Inventory control and management keeps track of the stock and requirements and effectively managing it. The student's attendance can be managed by using RFID based attendance management system. Time table management and exercise details gives a clear picture of the classes, exercises, units completed and to be covered in that particular lab sessions.

Hostel Management

Getting admission adds another question as to find a place of accommodation in the course of their study. We also provide solution to this by providing Information about the hostel facilities available, various facilities offered and the type of accommodation provided at the educational institution. Provides details about on-campus staying facilities and allows student to block a particular accommodation. Meals and utility expenses are displayed for each facility. Set and maintain the personal details about students and wardens with their photo. Mess management helps them monitor the inventory.

Course Management System

This helps a student undergoing a course largely because he/she might be eager to know about the course details the components of a course like Lectures, Recitations, Labs, Updates the assignment sections, Lectures, Projects to be submitted and also the last date of Submission, Project guidance online. Handles resource allocation like the allotment of sessions to the instructors, Rooms, Special

Equipment needed for each session. Class schedules can be rolled forward to future sessions.

Inventory Control

MindCampus provides us with an orderly Inventory Control system which maintains the inventory and updating the status of the stock present, what comes in and what goes out. Total inventory control and management system would have a total control of the inventory by informing if the stock is not available, if there is excess stock or if there is any other problem. Central store management system will manage the store which will have Automated stack evaluation and alert system.

Visitor Management

MindCampus takes care of the overall security by restricting the visitor entry to your campus. It comes with Visitor related data management and periodic reporting system which is an RFID based time management system. Unauthorized visitors are restricted to your campus by which a lot of protection is guaranteed. The Visitor pass generation with image capturing would take care of visitors entering the campus only if a pass is provided to them and their image will be captured and displayed on the desktop of the person whom the visitor wishes to meet. The visitor entry can also be rejected by the concerned person if he in turn does not want to.

Integrated Portal

Integrate multiple sites and view reports on demand with real-time data from a scaleable, centralized infrastructure. Incorporate automation to speed the cycle of recruiting, admissions, financial aid and student accounts. Accelerate inter-departmental workflow, creating dramatic new competencies-leveraging industry-leading student prospecting tools for seamless application-to-admission processing.

24/7 and off-hours support available, plus classroom, custom on-site and on-demand training, Virtual notice board.

As our product vice president had mentioned "Our goal is for customers to achieve operational excellence not only with software but with their internal business practices, too. He also adds that MindCampus serves around 200 campuses in higher education overall. "We concentrate on developing features for our software that have a demonstrable benefit in addition to meeting the needs of general market trends".
