

Mindlogicx announces free mock exam services for CAT aspirants

When the whole world is looking at India with vov for her stride in creating knowledge economy and moving forward as the next super power, there is a quiet revolution taking place in a part of the country. Mindlogicx Infratec Limited is set to revolutionize the world of education delivery by offering various reskilling and upskilling programmes to the aspiring students .

With the globalization of the economy, the whole world is considered to be *flat* and multitudes of opportunities are open now for the students to become reskilled in their areas of specialization. Many services are being offered across the country and a very few have moved up the value chain by taking the same online. The virtual mode of learning will be the future and more and more training institutes with specialization in various skills sets are getting into virtual mode. To create such interactive virtual class rooms and intelligent assessment system, the companies need to innovate constantly. The question now is, can India create the innovation platform in the coming years as what Japan did to quality in the last century? And can India become the innovation capital of the world? The answer is a definite "yes". And you will find the answer right here at Bangalore - the innovation capital of India .

Mindlogicx Infratec Limited have set up the India's first Knowledge Network Service (K.net) Platform and is quietly creating a knowledge revolution by tapping the implicit and explicit knowledge resources & processes and make them available to every one across the country using the wider network presence of their franchisee network.

Ever wondered how to prepare smartly for a competitive exam and outshine others? Ever thought that you could get into one of the prestigious Institutions in the country? Ever felt that somebody could help you working smart? The Virtual Education Delivery and Assessment System (VEDAS) is the answer for all your queries. The system has been carefully designed, developed and installed on the K.net platform to give the user the power to perform and the power to excel by delivering the knowledge @ the desktop of the user. The service delivery is enabled through an innovative product called Educards.

There are many variants of the Educards currently available now catering to various competitive / entrance exams at under graduate level like CET, IIT -JEE, AIEEE, PMT etc., which tests the knowledge level of the users subject wise & chapter wise, in addition to testing their skills dynamically against the VEDAS user community. Further the system also extrapolates the results for performance analysis and performance forecasting for the selected mock tests undertaken by the user. One such variant is meant for preparing students for CAT examination.

VEDAS has been built by the Company to e-integrate and deliver the knowledge resources as "on demand" service for the users and the services are offered as Managed Application Service (MAS) a concept fast catching up in the IT industry. The technology is unique, the delivery model is innovative & futuristic and the combination of these will give the user the pleasure of working on a virtual world to decide his own future at his own pace and on his own terms - all in his own world of virtual world called "*Youniverse*".

The system enables the user to measure up his knowledge on any subject, topic or even chapter using “Learning Path” (LP) which throws results in graphical mode on a real time basis. The Dash Board in the system uses a mathematical algorithm to analyze the users’ performance against the available data of the respective exams over a period of time and then throws a near accurate performance forecasting. The features in the Dash Board like Cruise Control, Fuel Tank and Ground Control , etc., are just beyond imagination in the education delivery system.

The market for test preparation for competitive exams and online finishing school for reskilling or upskilling are increasing manifold and the company’s strategic tie up with Education Times is the answer to this ever growing market demand. The company has announced one month free trial of their CAT test preparation services which any student can register online and start using the services absolutely free of cost. A fully integrated service framework has been exclusively made for this purpose and put in place.

The main objective, according to Mr. P S Srijith, Asst Vice President – Operations of Mindlogicx Infratec Ltd is to empower every student appearing for the current year CAT examination and give them a competitive edge over others. The ultimate objective of the K.net platform is to enable creation of knowledge society by technology as the enabler as he hoped that the association with Education Times would be a dominant force in Education Domain. The event is being organized jointly by Mindlogicx and Education Times with the objective of creating product visibility and establish Educard brand and its potential among the masses. This event will not only help to create the product awareness but also will encourage the prospective users to have a hands -on experience on VEDAS, the innovative technology platform for online skills assessments. This national level event will utilize the technological marvel of VEDAS and the media backbone of Education Times to provide first -ever service of this nature, in the history of education delivery in the country, he further observed.

This is an honest attempt by the company to enable aspiring students to crack the code for CAT. Mindlogicx with the mission of delivering knowledge @ the desktop of the user is committed to make this event a grand success by putting all the resources together, Mr Srijith added further.
